

REMARKS

In reply to the *Ex parte Quayle* Action of August 29, 2006, Applicant submits the following remarks. Claims 1, 2 and 46-47 have been amended. Claims 5, 8, 10, 16 and 43 have been amended to correct antecedent basis.

The drawings were objected to under 37 CFR 1.83(a). The Examiner has deemed that the claimed limitation, "spacer particles on the substrate to support the cap" must be shown or the features canceled from the claims.

Applicant has amended claims 1, 2 and 46 to require "spacer particles on the substrate capable of supporting the cap". Support for the amendment can be found at least in the published application, U.S. Publication No. 2003/0160318, at paragraph 33, "The spacer particles provide support for the cap over the area of the OLED cells, preventing the cap from contacting the active components of the device when pressure is applied to the cap", which corresponds to page 16, lines 5-9 of the application as filed.

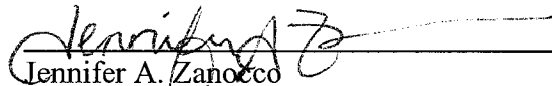

Applicant understands that prosecution is closed and thus is submitting a Request for Continued Examination under 37 CFR 1.114 with this reply. Applicant respectfully requests entry of the claim amendments.

Because the claims have been amended, applicant respectfully submits that no changes to the figures are required and that no additional figures are required. Applicant respectfully requests withdrawal of the objection to the drawings under 37 CFR 1.83(a).

No fee is believed to be due. If, however, there are any charges or credits, please apply them to Deposit Account No. 06-1050.

Respectfully submitted,

Date: October 27, 2006
